

Introducing Flexible Service Offerings to Fight Covid-19

JPB knows that we all need to work together to beat the COVID-19 Coronavirus. Therefore we are offering some flexible services that follow the CDC guidelines encouraging social distancing. If you need service, repair or calibration during this time but are concerned about person to person contact, we offer a variety of options including the following:

Pick-up and delivery service

Instead of repairing/calibrating your equipment in your facility, we can arrange for contact-less pick-up and delivery service.

Flexible Scheduling

We can send a Technician to your facility after hours or weekends when less of your staff is there to handle your repairs or calibrations.

Staggered Equipment Cycles

If you have a large amount of equipment that requires calibration or repair that we normally service on-site, we can stagger the pick-up and delivery of the items into lots so that you are never without the equipment that you use daily.

Contact us to discuss ways that we can work together to limit interaction and to follow the CDC guidelines on social distancing while keeping your facility running smoothly.
